

Gardening: summer excitement from dancing mirrors to simple tillers

Dancing Garden Mirrors—Tiny mirrors, center, effect the majesty of the Angel Trumpet's first lower of the season. — Photo by Kevin Butcher.

"It is filled with liberating suggestions that take the intimidation factor of growing roses away from gardeners."

Topics covered include shopping for roses, planting, matching, outsmarting pests, making roses and much more. There is also a section on drying roses.

While Walheim agrees that the "Dummy" series is a great way for beginners to learn first steps, he says that experienced gardeners will be able to pick up on tips that cover the finer points of gardening. The American Rose Society has praised his work on this book.

If you are looking for a new rose with an old-fashioned look this year, try the Rouge Royale™. Sporting a luscious burgundy to raspberry color with a citrus and berry scent as well as an old-fashioned European rose form, this is a contemporary rose for everyone.

The Rouge Royale™ is an abundant bloomer that will reward you with one to two sturdy flowers per long stem and holds up well in heat and rain. It is also a great rose for cutting. The cuttings will last up to two weeks in a vase.

Hardy in zones 5-9, this upright, vigorous rose stands three to four feet tall with glossy, dense, deep green foliage. It combines the beauty and exhibition of quality hybrid teas with the disease resistance, fragrance and hardiness of old-fashioned roses.

This rose, created by Meiland International, is a seasonal festival of aesthetic delight.

Rouge Royale™ will be available in fine garden centers and nurseries in spring 2002. To find out more about these and other fine Star® Roses or to find a garden center near you, visit <http://www.starroses.com>.

One of my favorite plant combinations for roses is planting baby's breath and lavender around them. You can use either the traditional white baby's breath or the pink. Other favorites include statice, garlic and carnations.

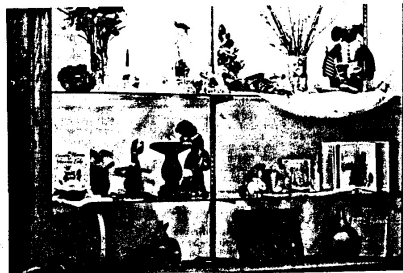

Special Gardens
For those of you who are into landscaping flower gardens to match your home's exterior, many paint companies offer exterior paints in traditional floral colors, thus allowing the home's exterior to blend in with the bedding plants.

The hot colors this spring will be pink and green," according to *Pulse* editor Ellen Tien of the *New York Times*.

From clothes, home and office furnishings, makeup to handbags, bathing suits, office stationery and of course, plants in your garden, pink and green is the color of choice.

Now, let me share this trick with you for creating lush-looking gardens like the professionals do.

The botanical garden I worked at used sand instead of soil because it was easier to work with.

The plants were then removed on a weekly basis, sometimes more often and replaced with ones that were just beginning to bloom.

This is a technique that would be easy to do at home, provided you grew your plants from seeds or cuttings and had a place to work with them.

As an alternative to that you could raise your beds so that the soil would be the same height as the edge of your bed; this would certainly save some digging!

Container Gardens
Another alternative is to use containers. I would position a large upright plant in the center, such as a small evergreen tree. Then place three or four smaller plants between the large pot and the edge of the container.

You could then fill in the gaps with smaller pots or use moss, bark or another similar edging material to hide the sides of the pots.

Your friends and neighbors will admire your garden and praise you for the great work. You are the only one who will need to know the truth about how easy it is to do, unless of course, you choose to share your secret with others!

If you are looking for something to do to get in the mood for spring, visit the Grant County Evening Gardening Club display "Under the Cabbage Patch" at the Marion Public Library. Lush roses, lots of rabbits and other springtime accessories are sure to get you in the mood for planning.

Quilt Garden
Local projects this year include the revamping of the Webster House gardens in Marion. Marie Webster took flowers from the original gardens and planted and pressed them. She

then incorporated these designs into her quilts. The new gardens will contain many of these same types of plants. For more information or to volunteer to work on the gardens, please contact Joyce Hostetter at (765) 664-7927.

PAR Gardens
If you are planning a vegetable garden this year, why not donate some of the extra produce this year to local food pantries or soup kitchens?

According to Sharon Wren, garden writer, this year's PAR program will be a top priority to many. The reason may have to do with the new American attitude towards helping each other. After 9/11, blood banks in New York and elsewhere were overwhelmed with people willing to donate.

"Millions and millions of dollars have been sent to help those directly affected by that day's events," she added.

Now the emphasis is turning towards helping other charities. Plant A Row encourages gardeners to plant an extra row of tomatoes, carrots and so forth and donate them to a local food pantry or homeless shelter. More information can be found at their website: <http://www.plantarow.org/>.

While donating blood and/or money is wonderful, so is sharing the fruits (literally) of your garden labor.

Locally, there are several food banks that will take donations of fresh herbs, fruits and produce. PAR does request that you weigh your donation before you take it to a food pantry or soup kitchen of your choice.

You would then call in the amount of your donation as well as the pantry's name you will be donating to. The number for local residents is (317) 848-7351. Ext. 125. This year's goal is to donate 2002 pounds of fresh produce.

Electric Tiller

This spring we will see the release of the new Mantis Electric Tiller. For many home-owners, this new tiller will mean having the choice of being able to till their own gardens.

Equipped with a built-in extension cord, an easy squeeze throttle trigger with three speeds and tines that spin up to 240 rpm, this is the perfect answer for people who cannot use a traditional tiller due to the strength required to pull the cord.

It also takes up less space and has fold-down handles for easier storage.

Rose Food

Bayer also has a new rose care product on the market this spring. According to Walheim, "Bayer products are easier to use, easier to apply, longer lasting and more effective" compared to other rose care products on the market. The 2-1 Rose Feed will feed and protect against insects for six weeks. It also promotes strong roots, beautiful blooms and has a strong rainproof protection.

You simply pour a capful of this product around the roots of your rose bush, hand cultivate and water. Children and pets may enter the area after you water.

For additional information, please visit their website at http://bayeradvanced.com/pg/pg_gp.html

Garden Mirrors

If you want to give your garden a really interesting feature this year, try the Dancing Garden Mirrors. They attract birds and scare off deer. They cast an enchanting reflection about the garden.

I have a set of these and find watching the reflections a real

delight. They come in packs of four with two small, round mirrors per strand.

For more information please visit

<http://www.dancinggardenmirrors.com>

Finally, remember when you are working in your garden this summer, read all labels carefully and follow the directions. Also, take a few extra minutes to use proper clothing and tools.

Proper preparation can save a lot of mishaps and make the summer months much more enjoyable for you and your family.
